Advanced Sovereignty and Accredited Investors Package (ASAIP)

Services includes:

- US Registered Agent
- US Business Registration
- US Virtual Business Address and Phone
- US EIN (Employer Identification Number)
- Revenue-Based Funding Project

Advanced Sovereignty is about achieving Commercial Solvency by entering into the elite of high net worth individuals, known as the A Class.

Introduction to the Accredited Investor

Please start by visiting our blog post: The Accredited Sovereign, [here](#).

The 3 classes of the new world as explained in the blog are as follows:

- A Class** – Accredited Investors
- B Class** – Essential Companies
- C Class** – Small businesses and common people.

The purpose of this package is for fast-tracking individuals (i.e., common people), certified sovereigns etc., into the A Class position. First of all, let us remind ourselves of what the criteria would entail for individuals. To qualify as Accredited Investors individuals must meet any of the following wealth, income, or financial sophistication criteria:

Financial Criteria:

- Net worth over \$1 million, excluding primary residence (individually or with spouse or partner)
- Income over \$200,000 (individually) or \$300,000 (with spouse or partner) in each of the prior two years, and reasonably expects the same for the current year.

Professional Criteria:

- Investment professionals in good standing holding the general securities representative license (Series 7), the investment adviser representative license (Series 65), or the private securities offerings representative license (Series 82)

- Directors, executive officers, or general partners (GP) of the company selling the securities (or of a GP of that company)
- Any “family client” of a “family office” that qualifies as an accredited investor
- For investments in a private fund, “knowledgeable employees” of the fund.

So as can be seen, for individuals to be considered as Accredited Investors, it is quite a tall order according to the Securities and Exchange Commission (SEC) criteria listed above. This is why we encourage setting up a corporation within the US with specific criteria as that will propel us into the A Class, from day one. Do note however that you can have an Accredited company as well as being an Accredited Individual, as the company’s Director/Official.

Fees:

£1000: one-time Agency Fee.

This includes having a Registered Agent within the US that will represent your company. The agent will do all the registration for your company. They will also assist you with acquiring the US EIN (Employer Identification Number). Your company will also be allocated a virtual office address and telephone number including telephone answering service and dealing with enquiries. If you require a website, which is essential, we can negotiate a fee for you or you can make website arrangements yourself.

£300: for any additional company.

You can setup as many companies as required. They will all share the same virtual address, but the telephone numbers will be unique.

\$76: for each company registration.

This is payable by yourself online at the time of registration with a walk-through with your Registered Agent.

£500 annual fee.

This is a one-time annual fee which is to maintain all services regardless of number of companies, being managed by the Registered Agent.

\$7 - \$20 monthly, per telephone number.

The local US virtual phone service is paid monthly. Your Agent will answer calls for you, deal with enquires, and anything administrative for your business.

Criteria for companies to be considered as Accredited Investors include:

Investments:

- Entities owning investments in excess of \$5 million.

Assets:

- The following entities with assets in excess of \$5 million: corporations, partnerships, LLCs, trusts, 501(c)(3) organizations, employee benefit plans, “family office” and any “family client” of that office.

Owners as Accredited:

- Entities where all equity owners are accredited investors.

Investment Advisers:

- Investment advisers (SEC- or state-registered or exempt reporting advisers) and SEC-registered broker-dealers.

Financial Entities:

- A bank, savings and loan association, insurance company, registered investment company, business development company, or small business investment company or rural business investment company.

This package will focus on the Asset criteria, due to its simplicity. By registering a company with a minimum of 5,000,000 shares, automatically qualifies for the \$5M in assets. I.e., \$1 per share.

As for your company's bank account, we recommend setting up an account with [Wise](#) online, after all the registration processes are complete.

Revenue-Based Funding

Your appointed Agent will explain this process in detail.

Some of the benefits of becoming an Accredited Investor with FRRf

- Immediate qualification with \$5,000,000 share-value in your corporation
- Unique investment opportunities, not available to B Class and C Class categories
- Increased diversification in your asset portfolio
- Enter into the classification of generational wealth builders
- Access to funding for various types of projects
- Live life well above the means of B Class and C Class individuals.

Payment arrangements are available on request, subject to qualifying conditions

Please note that the Agency fees are quoted in £-GBP, whereas the company registration of \$76 is payable online in \$-USD. The phone service fee will also be payable online to the Agent. The \$7 - \$20 per number is depending on the blocks of numbers available.
